1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Kit species: I) Figures 1-8; II) Figures 9 and 10; III) Figure 11; IV) Figures 12-16; V) Figure 21; VI) Figure 22; VII) Figures 23-25; VIII) Figures 26-29; IX) Figures 30-34; and X) Figures 35-36.

Swab species: A) Figure 17; B) Figure 18; C) Figure 19; and D) Figure 20.

Applicant is required, in reply to this action, to elect a single species from each group to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following- manner:

Species I) Claims 1-11, 20, 23-26, 28-29 and 32.

- Species II) Claims 1-11, 20-26 and 28-30.
- Species III) Claims 1-15, 20, 23-26 and 28-32.
- Species IV) Claims 1-15, 20, 23-26 and 28-32.
- Species V) Claims 1-11, 23-26 and 28-32.
- Species VI) Claims 1-11, 23-26, 28-29 and 31-40.
- Species VII) Claims 1-16, 23-26 and 28-32.
- Species VIII) Claims 1-16, 23-26 and 28-32.
- Species IX) Claims 1-19 and 23-32.
- Species X) Claims 1-16, 19, 23-26 and 28-32.
- Species A) Claims 1-40.
- Species B) Claims 1-40.
- Species C) Claims 1-40.
- Species D) Claims 1-40.

The following claim(s) are generic: 1-11, 23-26 and 28-29.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: There is no present evidence or indication by applicants' that the differences among the various species do not constitute separate patentable subject matter, and not merely obvious variations of a single general inventive concept.

4. A telephone call was made to Michelle Lester on September 5, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bryon P. Gehman whose telephone number is (571) 272-4555. The examiner can normally be reached on Monday through Wednesday from 7:00am to 3:30pm.
